

# BIOPOINT™

## PREMIUM BIOLOGICAL

# RESIPOINT

BioPoint™ Resipoint by NexStar Crop Performance™ is specifically designed to break down crop residue in the field, improving planter performance and releasing valuable nutrients to feed the crop.

Decades of research has proven that rapid and uniform emergence can improve yields 3-6%. BioPoint™ Resipoint puts you in the position to optimize performance...

### SPEED & EFFICIENCY

BioPoint™ Resipoint speeds up the breakdown of crop residue—creating the ideal environment for today's high speed planters. The microbes and high-carbon formulation of BioPoint™ Resipoint demolishes residue so consistent planting depth and seed spacing can be achieved.

### IMPROVE STAND COUNTS IN REDUCED-TILLAGE

By not having residue pinned in the furrow, soil to seed contact will be improved, giving every seed the best chance for even emergence.

### BRINGS FIELD-AVAILABLE NUTRIENTS TO YOUR CROP

The high carbon source and blend of 6 proprietary microbes in BioPoint™ Resipoint stimulate and fortify biological activity, releasing field-available nutrients from crop residue. Initial data indicates increases of up to 30-40 lbs N, 5-10 lbs P and 35-40 lb K in the crop following BioPoint™ Resipoint application.

## SPEED | EFFICIENCY | NUTRIENT RELEASE

### Guaranteed Analysis

Alkyl Polyglycoside (surfactant) .....	35.00%
Organic acids (pH buffer) .....	5.00%
Rheology and dispersant agents .....	5.00%
Fulvic Acid .....	1.00%
Bacillus licheniformis	$3.9 \times 10^5$ CFU/Gm
Bacillus coagulans	$3.9 \times 10^5$ CFU/Gm
Bacillus subtilis	$3.9 \times 10^5$ CFU/Gm
Bacillus pumilus	$3.9 \times 10^5$ CFU/Gm
Bacillus megaterium	$3.9 \times 10^5$ CFU/Gm
Bacillus amyloliquefaciens	$3.9 \times 10^5$ CFU/Gm

In the final liquid form, contains 700 billion total colony forming units (CFU's) per gallon ( $7 \times 10^{11}$  CFU/gal) of the above soil health microbes (1 gm = 1 ml).

### DIRECTIONS FOR USE

In reduced-till scenarios, apply post-harvest on all crop residues.

For best results, include UAN in total solution.

Specific timing for optimal use varies based on tillage practices, fertility levels and other factors. Contact NexStar™ Crop Performance for specific recommendations for your farm.

### RECOMMENDED USE RATE

Apply 12.8 oz per acre with a minimum 10 gallons of water.

Highly compatible tank mix partner with most herbicide and fertility programs.

### PRODUCT AVAILABILITY

Available in both 2.5 gallon jugs and 250 gallon totes.
